BX tri-color controller products

- ▶ BX-6th generation tri-color voice series
- ▶ BX-5th generation dual color series

Create the full range of industrial LED controller

Mission. Innovation. Growing

Endeavoring to contribute to the prosperous development of LED industry

SHANGHAI ONBON TECHNOLOGY INC.

Onbon whose headquarter is located in Chinese famous high-tech industry zone—Shanghai Caohejing New Technology development district, is a high-tech enterprise who is professional in LED application technology research, LED control system manufacture and primary LED controller supplier. It is one of the best software enterprises and high-tech companies in Shanghai.

Established in May 2009, Onbon technology has grown very fast, it has formed a strategic layout integrating three R&D centers in Shanghai, Shenzhen and Suzhou and powerful marketing network including 6 marketing center, 30 Representatives and nearly 200 Distributors located in the main cities of China. On the other hand, Onbon fixed its eyes on overseas market and has set up 4 branch offices, 25 authorized distributors in the overseas market.

In 2012, Onbon got into the field of LED lights and LED landscape ligths. With 50 mu industrial land in the Kunshan Optoelectronics Park dedicates in establishing and creating the most competitive LED controlling assembles and LED green lights products. With total investment RMB200 million, and total area 47,128 square meters. And it started to run in market at june 2015.

In 2016, To ensure a steady stream of research, Onbon announced a big strategic investment in Suzhou China, focus buiding first-class research and development (R&D) base in Suzhou.

In the past years, Onbon concentrated on the development of high-performance as well as high-quality LED controlparts. We concentrated on providing our customers professional technological consultancy and the best solutions.

We kept applying the latest updated technologies of embedded system, graphics processing, and digital video on our products design. Onbon, with its continuing technological innovation and application, has made a positive contribution to the LED industry.

Onbon gains high regards from customers for their professional designs, superior quality, and excellent service. In the further development, Onbon will not only adhere to the policy of being Professional and providing good services, but also insist on technological innovation and technical services. Onbon will continue to develop and strengthen the cooperation with all end users, system integration, LED manufacturers and distributors.

2018 , ONBON will make a colorful world

The most complete LED control system products in LED industrial

<p>SYNC Full Color Controller</p> <p>Higher refreshment, Better display effect Bigger control size, Better experience</p> 	<p>Multi-media Player</p> <p>Integration SYNC & ASYN Products Large/medium cluster network control</p> 	<p>Video Processor & Controller</p> <p>Compatible with LED controller More breaks and innovation</p> 
<p>Lintel Full Color Controller</p> <p>Best solution for lintel full color screen and LED posters</p> 	<p>Full Range Of LED Controller • Industrial •</p>	<p>BX-5 Series Single&Dual Color BX-6 Series Tri-color Audio Controller Audio Font Library Controller</p> <p>Support all kinds of full color module Support audio broadcast Match with all kinds of device</p> 
<p>Wireless Communication Products</p> <p>Meet with all kinds of wireless Communication screen requirements</p> 	<p>Customized Products</p> <p>Leader of the cluster projects Intelligent city/Environmental monitoring/ Flexible connect to the industrial site</p> 	<p>Multimedia Info Release Platform</p> <p>Based on cloud technical Any time any where, Efficient and intelligent Secure and easy application</p> 

BX controller is the first choice of big and middle LED group system projects

- The most completed LED control system products in LED industrial
- The leader of the application and development of LED controlling techniques by strong innovation ability
- Supply fast second development and customized service by professional engineers team
- Supply the best software and online updating technical
- We get wide application of all kinds of LED cluster system
- Hundreds of agents in all over the world can supply professional and local service

ONBON supply best products and customized service

After 10 years, BX is the specified brand for big projects !

BX market share is more than 70% in the update LED projects !

About BX-6th generation tri color voice series

Specially used for big project bid

Onbon BX-6th generation products highlight the noble, the pursuit of excellence. High core technology innovation, continue to lead the industry

- (1) Support Tri-color display, support smart scan.Easy to compatible with special modules and full color modules
- (2) Single core framework, dual core display, best display performance, Single core architecture, dual core performance
- (3) Solve most problems for single core controllers: Text seriously wrong column when shift to left. Screen jitter when move to lift and the brightness is seriously reduced when shift lift in long screen, Significantly improved refresh rate
- (4) Display effects real-time preview, u will get what u see, screen movement speed arbitrary adjustment, screen moving more smoothly
- (5) On-board many kinds of sensor interface , support all kinds of environmental test sensors
- (6) Richer interface, stronger function, more excellent craft, more stable performance

The 6th generation common products BX-6U/6A/6M series

BX-6th generation controller	Control size & Display mode
BX-6UT-0812	single color /dual color 16K pixels, 1024*16 512*32 336*48 256*64
BX-6UT-75	tri color 16K pixels, 1024*16 512*32 256*64 128*128
BX-6U0 /BX-6A0 -YY	single color 32K /dual color 24K /tri color 16K pixels, 2048*16 1024*32 672*48 512*64
BX-6U1(S+U) /BX-6A1(RS485) -YY	single color 64K /dual color 48K /tri color 32K pixels, 3200*16 2048*32 1344*48 1024*64
BX-6U2(S+U) /BX-6A2(RS485) -YY	single color 128K /dual color 96K /tri color 64K pixels, 3200*32 2048*64
BX-6U3(S+U) /BX-6A3(RS485) -YY	single color 128K /dual color 96K pixels, 3200*32 2048*64 1024*128
BX-6U(S+U) -YY	single color /dual color 64K pixels, width≤512, 512*128
BX-6MT-0812(E+U)	single color /dual color 16K pixels, 1024*16 512*32 336*48 256*64
BX-6MT-75(E+U)	tri color 16K pixels, 1024*16 512*32 256*64 128*128
BX-6M0(E+U) -YY	single color 32K /dual color 24K /tri color 16K pixels, 2048*16 1024*32 672*48 512*64
BX-6M1(E+U) -YY	single color 64K /dual color 48K /tri color 32K pixels, 3200*16 2048*32 1344*48 1024*64
BX-6M2(E+U) -YY	single color 128K /dual color 96K /tri color 64K pixels, 3200*32 2048*64
BX-6M3(E+U) -YY	single color 128K /dual color 96K pixels, 3200*32 2048*64 1024*128
BX-6M(E+U) -YY	single color /dual color 64K pixels, width≤512, 512*128
BX-6E1(E+S+U)	single color 512K pixels, width≤2048, 2048*256 1344*384 1024*512
	dual color 256K pixels, width≤2048, 2048*128 1344*192 1024*256
	tri color 160K pixels, width≤2048, 2048*80 1280*128 1024*160
BX-6E2(E+S+U)	single color 1024K pixels, width≤4096, 4096*256 2720*384 2048*512
	dual color 512K pixels, width≤4096, 4096*128 2720*192 2048*256
	tri color 320K pixels, width≤4096, 4096*80 2560*128 2048*160
BX-6E3(E+S+U)	single color 4096K pixels, width≤8192, 8192*512 5440*768 4096*1024
	dual color 2048K pixels, width≤8192, 8192*256 5440*384 4096*512
	tri color 1280K pixels, width≤8192, 8192*160 5440*240 4096*320
BX-YY voice broadcast module	Match with BX-6E /6Q series, meet with all kinds of voice project requirements
“-YY”means the voice cluster module, BX-6E series matched with BX-YY, meet with voice projects requirements	

BX-5th generation dual color series

Perfect definition of LED dual color controller

Advantages of BX-5th generation products :

- (1) Support: a, Adjust the brightness automatically by brightness sensor. b, Weather forecast
- (2) BX-5E series is the leader for speed performance, smooth image technology and super long control size
- (3) BX-5M/5E/6E series support server mode and internet transmitting, Can be connected with kinds of switchboard and it's very stable on some complicated networks."
- (4) All BX products support temperature /temperature&humidty sensor,
Support IR controller /button select the program 5E/6E series support kinds of noise sensor
- (5) Eight techniques: Area frame /text animation /colorful background /IR controller /transfer from
the break point /super long&high control /full color with gray scale /wireless built-in
- (6) Higher brightness, Bigger control area, Faster communication, Higher refreshment, More stable screen,
More smooth movement, Stronger function, Simple operation
- (7) Support 3.5-6V working voltage, -40°C ~ 80°C working temperature

The 5th generation common products BX-5U /5A /5M series

BX-5th generation controller	Control size & Display mode
BX-5UL	single color 10K pixels, dual color 5K pixels /width half reduce, 640*16 320*32
BX-5UT /BX-5AT	single color 16K pixels, dual color 8K pixels /width half reduce, 1024*16 512*32 336*48 256*64
BX-5U0 /BX-5A0	single color 32K pixels, dual color 16K pixels /width half reduce, 2048*16 1024*32 672*48 512*64
BX-5U1(S+U) /BX-5A1(RS485)	single color 64K pixels, dual color 32K pixels /width half reduce, 3200*16 2048*32 1344*48 1024*64
BX-5U2(S+U) /BX-5A2(RS485)	single color 100K pixels, dual color 50K pixels /width half reduce, 3200*32 2112*48 1600*64
BX-5U3(S+U) /BX-5A3(RS485)	single color 128K pixels, dual color 64K pixels /width half reduce, 3200*32 2048*64 1344*96 1024*128
BX-5U4(S+U) /BX-5A4(RS485)	single color 128K pixels, dual color 64K pixels /width half reduce, 2048*64 1024*128 672*192 512*256
BX-5U(S+U)	single color 128K pixels, dual color 64K pixels (width≤512pixels), 512*256
BX-5A	single color 64K pixels, dual color 32K pixels /width half reduce, 1024*64 512*128 320*192 256*256
BX-5MT(E+U)	single color 16K pixels, dual color 8K pixels /width half reduce, 1024*16 512*32
BX-5M1(E+U)	single color 32K pixels, dual color 16K pixels /width half reduce, 2048*16 1024*32 672*48 512*64
BX-5M2(E+U)	single color 128K pixels, dual color 64K pixels /width half reduce, 3200*16 3200*32 2688*48 2048*64
BX-5M3(E+U) new version	single color 128K pixels, dual color 64K pixels /width half reduce, 3200*32 2048*64 1344*96 1024*128
BX-5M4(E+U)	single color 128K pixels, dual color 64K pixels /width half reduce, 2048*64 1024*128 672*192 512*256
BX-5E1(S+U)/(E+U)	dual color 256K pixels (width≤2048pixels), 2048*128 1344*192 1024*256
BX-5E2(S+U)/(E+U)	dual color 512K pixels, 4096*128 2048*256
BX-5E3(E+S+U)	dual color 1024K pixels BX-5UL, 8192*128 4096*256 2048*512

Strong • Stable 

BX-6M Series

**Support tri-color, compatible for all kinds of full color modules,
single core framework, dual core display, best display performance**

- (1) support smart scan, support all kinds special module and full color modules
- (2) BX-6M-YY support Chinese/English voice broadcast function, meet with all kinds of voice project requirements
- (3) Added new "Smart search IP /automatically search device " function BX-6M series supports 8 areas/128 programs
- (4) Solve most problems for single core controllers: Text seriously wrong column when shift to left. Screen jitter when move to lift and the brightness is seriously reduced when shift lift in long screen, Significantly improved refresh rate
- (5) Display effects real-time preview, u will get what u see, screen movement speed arbitrary adjustment, screen moving more smoothly
- (6) On-board brightness / temperature / temperature and humidity sensor interface seat,
On-board infrared remote control head socket
- (7) 2 nos of T75 + 2 nos of T8 + 4 nos of T12 on board of BX-6M0/6M1/6M2,
4 nos of T8 + 8 nos of T12 on board of BX-6M3/6M

Support all kinds of single/dual/tri-color LED screens

Support all kinds of mainstream LED screen chip

Memory 2MByte

Maximum power ≤2W

Working voltage 5V (3.5V ~ 6V)

Working temperature -40°C ~ 80°C

BX-6M series products model:

BX-6MT /6M0 /6M1 /6M2 /6M3 /6M

BX-5M series

Support server and Internet transmit, compatible with all brands of switches, strong suitability and stable communication

Carry forward the classic,
Forge ahead into the future,
Make full use of the single-CPU Controller comprehensive performance,
August 2010, BX-4M series products were launched,
Be the first network LED controller by single-CPU Controller,
Fill the gap in the industry by launching the controllers with on-board 100M network and USB interface
Feb 2012, BX-5M series products were launched,
Quickly capture market by excellent performance and perfect design

BX-5M series products model:

BX-5MT /5M1 /5M2 /5M3 /5M4

BX-6E series

**Support tri-color, compatible for all kinds of full color modules.
More excellent control size, more smoothly display moving,
multiple Chinese/English font library inside,
support other language font library**

- (1) Support smart scan, support all kinds special module and full color modules
- (2) Match with BX-YY, support Chinese/English voice broadcast, meet voice project requirements
- (3) More excellent control size more excellent control size: W≤8192 pixels, H≤1024 pixels, maximum pixels 4096K
BX-6E series match with HUB512-T8 or HUB 512-T12(special for single color screen use)
each 50pin port can control 512 pixels in height, if screen height ≤256 also can use normal HUB
- (4) Added new "Smart search IP / automatically search device " function ;support 32 areas /256 programs
- (5) Display effects real-time preview, u will get what u see, screen movement speed arbitrary adjustment, screen moving more smoothly.
- (6) On-board brightness / temperature / temperature and humidity sensor interface seat,
On-board infrared remote control head socket.
- (7) Support multiple dynamic areas, support update info in real time, Chinese /English font library inside, support other language font library.
- (8) Provide real-time communication protocol (compatible with the 6K protocol).
special used for all kinds of secondary development.

Application support all kinds of single/dual/tri-color LED screens

Support all kinds of mainstream LED screen chip

Memory 4MByte

Maximum power ≤3W

Working voltage 5V (3.5V ~ 6V)

working temperature -40°C ~ 80°C

BX-5E series products model:

BX-6E1 /6E2 /6E3 (E+S+U)

BX-5E series

Support super large size LED screen, widely used in all kinds of LED intel screens and LED cluster display system.

Support server and Internet transmit, compatible with all brands of switches, strong suitability and stable communication

BX dual color flagship product,
August 2007, BX-E series products were launched,
Be the first LED controller with 100M network port on board.
June 2012, BX-5E series products were launched,
Quickly capture market by excellent performance and perfect design

BX-5E series products model:

BX-5E1 /5E2 (E+U) BX-5E3 (E+S+U)

BX-6K series

**Support tri-color, compatible for all kinds of full color modules
single core framework, dual core display, best display performance**

Solve most problems for single core controllers:
Text seriously wrong column when shift to left. Screen jitter when move to left and the brightness is seriously reduced when shift left in long screen, Significantly improved refresh rate

BX-6th generation voice font library controller

BX-6K series	Control size & Display mode
BX-6K1 (S+U)/(E+U)	single color /dual color /tri color 32K pixels, width≤512, 512*64
BX-6K2 (S+U)/(E+U)	single color 128K /dual color 96K /tri color 64K pixels, widths≤2048, 2048*64
BX-6K3 (S+U)/(E+U)	single color 128K /dual color 96K pixels, widths≤2048, 2048*64 1344*96 1024*128
BX-6K1-YY (S+U)/(E+U)	single color /dual color /tri color 32K pixels, width≤512, 512*64
BX-6K2-YY (S+U)/(E+U)	single color 128K /dual color 96K /tri color 64K pixels, widths≤2048, 2048*64
BX-6K3-YY (S+U)/(E+U)	single color 128K /dual color 96K pixels, widths≤2048BX-6K1 (S+U)/(E+U), 2048*64 1344*96 1024*128
<div>1. Supply protocol, specially used in secondary development project like industrial site, match equipment, bus display ,intelligent bus station and cluster system display etc</div> <div>2. BX-6K compatible with 5K protocol, easy to development, support all kinds of sensors. BX-6k-YY support Chinese/English broadcast.</div> <div>3. Higher refreshment display, update in real time with stable image displaying without blinking</div> <div>4. BX-6K1/6K2 2 nos T75 + 2 nos T8 + 4 nos T12 on board, BX-6K3/6K3-YY 4 nos T8 + 8 nos T12 on board</div>	

BX-5K series

**Built-in font library, oriented to all kinds of special application systems,
flexible to meet customer requirements.
Support multi-group area dynamic update,
Supply protocol, support secondary development**

The first font library LED controller in the industry,
oriented to all kinds of special application systems.
Supply open secondary development platform,
Flexible to meet special requirements of customers,
June 2011, BX-4K launched into market.

BX-5th generation voice font library controller

BX-5K series	Control size & Display mode
BX-5K1 (S)	single color 48K pixels, dual color 24K pixels /width half reduce, 2048*16 1536*32 1024*48 768*64
BX-5K2 (S)	single color 72K pixels, dual color 36K pixels /width half reduce, 2048*32 1152*64 576*128 384*192 288*256
BX-5MK1 (E)	single color 72K pixels, dual color 36K pixels /width half reduce, 2048*16 2048*32 1536*48 1152*64
BX-5MK2 (E)	single color 72K pixels, dual color 36K pixels /width half reduce, 2048*32 1152*64 576*128 384*192 288*256
BX-5K1Q-YY (E+U)/(S+U)	single color 72K pixels, 2048*16 2048*32 1536*48 1152*64
	dual color 36K pixels /width half reduce, 2048*16 1024*32 768*48 576*64
	tri color 24K pixels BX-5K1(S), 1344*16 672*32 512*48 384*64
1. Supply protocol, specially used in secondary development project like industrial site, match equipment, bus display, intelligent bus station and cluster system display etc	
2. BX-5K1Q-YY support Chinese /English voice broadcast function, abundant interface, support all kinds of single color/dual color /tri color LED screen	

BX-6U /6A series

**Support tri-color, compatible for all kinds of full color modules.
single core framework, dual core displa, best display performance**

- (1) Support tri-color, compatible with all kinds of special module and full color modules
- (2) Support 8 areas /128 programs
- (3) Solve most problems for single-core controllers:
Text seriously wrong column when shift to left. Screen jitter when move to left
and the brightness is seriously reduced when shift lift in long screen, and black screen in communicating
- (4) Edit real-time preview, u will get what u see, screen movement speed arbitrary adjustment,
screen moving more smoothly
- (5) On-board brightness / temperature / temperature and humidity sensor interface seat,
On-board infrared remote control head socket
- (6) 2 nos of T75 + 2 nos of T8 + 4 nos of T12 on board of BX-6U0/6U1/6U2,
4 nos of T8 + 8 nos of T12 on board of BX-6U3/6U
- (7) 2 nos of T75 + 2 nos of T8 + 4 nos of T12 on board of BX-6A0/6A1/6A2,
4 nos of T8 + 8 nos of T12 on board of BX-6A3

Application support all kinds of single/dual/tri-color LED screens

Support all kinds of mainstream LED screen chip

Memory 2 MByte

Maximum power ≤2W

Working voltage 5V (3.5V ~ 6V)

Working temperature -40°C ~ 80°C

BX-6U series products model: BX-6UT-0812 /6UT-75 /6U0 hot sales card BX-6U1 /6U2 /6U3 /6U (S+U) -YY

BX-6A series products model : BX-6A0 BX-6A1 /6A2 /6A3 (RS485) -YY

BX-5U/5A series

Upload program by U disk, easy to install, free wiring serial communication, easy operation, wide application

The first USB controller in the industry, strong recognition to all kinds of USB driver, BX-5U with more innovation technology, subvert traditional again and create classics

A typical product,
A revolutionary product which subverted the tradition,
August 2006, BX-A was launched,
It became the first industrial single-CPU controller.
July 2012, BX-5A series products were launched,
They are popular in the industry because of perfect design
and outstanding performance

BX-5U series products model: BX-5UL /5UT /5U0 BX-5U1/5U2/5U3/5U4/5U (S+U)

BX-5A series products model: BX-5AT /5A0 BX-5A1 /5A2 /5A3 /5A4 (RS485)

BX-6th generation wireless series

Support tri-color, compatible for all kinds of full color modules.
single core framework, dual core display, best display performance

BX-6th wireless GPRS products	BX-6th generation wireless WIFI products
BX-6A0&G	BX-6WT-0812 antenna on board
BX-6A1&G	BX-6WT-75 antenna on board
BX-6A2&G	BX-6W0(WIFI+U) antenna on board
BX-6A3&G	BX-6W1(WIFI+U) antenna on board
BX-6K1&G	BX-6W2(WIFI+U) antenna on board
BX-6K2&G	BX-6W3(WIFI+U) antenna on board
BX-6K3&G	BX-6W(WIFI+U) antenna on board
BX-3GPRS wireless module	BX-WIFI (antenna outside)
	The external antenna is strongly recommended in the networking application, and the signal is better.

BX-5th generation wireless serie

BX-5th generation wireless products	
BX-5th generation wireless products	BX-5AT&G
BX-5AT&WIFI antenna on board	BX-5A0&G
BX-5A0&WIFI antenna on board	BX-5A2&G
BX-5A1&WIFI antenna on board	BX-5K1&G
BX-5A2&WIFI antenna on board	BX-3GPRS wireless module
BX-5A3&WIFI antenna on board	BX-RF100S wireless sending module
BX-5A4&WIFI antenna on board	BX-RF receiver module (including antenna)
BX-WIFI (antenna outside)	BX-5A2&RF wireless controller
To get a better signage, we suggest antenna outside when group network use.	BX-5A4&RF wireless controller
	Sending power 100MW, stable transfer date within 300 meters

BX-6th generation voice cluster series

BX-6th generation products cluster with voice module, or compatible with BX-YY, support Chinese and English voice broadcast, meet with all kinds of voice project requirements

BX-6th voice cluster series

BX-6U0-YY

BX-6U1-YY (S+U)

BX-6U2-YY (S+U)

BX-6U3-YY (S+U)

BX-6U-YY (S+U)

BX-6A0-YY

BX-6A1-YY (RS485)

BX-6A2-YY (RS485)

BX-6A3-YY (RS485)

BX-6M0-YY (E+U)

BX-6M1-YY (E+U)

BX-6M2-YY (E+U)

BX-6M3-YY (E+U)

BX-6M-YY (E+U)

BX-YY voice broadcast module:

Match with BX-6E/6Q series, support Chinese/English voice broadcast, meet with voice projects requirements

BX-6th generation products support environment detecting function

**BX-6th generation products support environment detecting sensors:
Wind direction /speed sensor, air mass sensor and noise sensor**

BX-6th generation products support wind direction/speed sensor, air quality sensor PM2.5/P10, noise sensor, temperature sensor, temperature/humidity sensor and brightness sensor, and support all most of the environment sensors, it can monitor atmospheric environment all-around.

In the intelligent city, sensors are the very important data for collecting equipment. Those equipment which used for environment detecting is not only the collecting terminal for big data system in this intelligent city, but also offer citizens a reference for going outside. So, show these data on LED screen, all citizens can see it, as to get a widely performance.

Except BX-6Q0/6QL, all BX-6Q series support environment detecting sensor. Also, it's adding to 6th generation products.

Suggest users to get the power with 12V/4A for BX environment detecting sensors.

BX environment detecting sensors all adopt 4 wires mode (12V power supply and RS485 communication port).

4 wires mode: Brown 12V, Black GND, Yellow 485-A and Blue 485-B)

Note: It will burn the sensor if you do not connect in a right way.

environmental monitoring sensor	BX-6th generation support environmental monitoring sensor	
*wind direction sensor BX-FX (485)	BX-6U1 (S+U)	BX-6M0-YY (E+U)
*wind speed sensor BX-FS (485)	BX-6U2 (S+U)	BX-6M1-YY (E+U)
*air mass sensor BX-PM (485)	BX-6U3 (S+U)	BX-6M2-YY (E+U)
*noise sensor BX-ZS (485)	BX-6U (S+U)	BX-6M3-YY (E+U)
temperature sensor	BX-6Q1	BX-6M-YY (E+U)
temp&humidity sensor	BX-6Q2L	BX-6E1
brightness sensor	BX-6Q2	BX-6E2
Infrared remote controller (including the receiver)	BX-6Q3L	BX-6E3
* means environmental monitoring sensor	BX-6Q3	

BX-6th generation hot sales cards

**Support tri-color, compatible for all kinds of full color modules.
single core framework, dual core display, best display performance**

Products model	Control size	Display mode	Display interface
BX-6MT-75	tri color 16K pixels	1024*16 512*32 256*64 128*128	2 nos T75
